**ENVIRONMENTAL
POLICY**

FOR A CLEANER, GREENER NEW ZEALAND

UPDATED JUNE, 2020

CLEAN BOSS

Clean Boss is conscious of our social responsibilities with regards to helping the environment through our working practices.

Our objective is not only to sustain our environment for the future generations of New Zealand, but also to improve it.

We believe that our corporate responsibility goes beyond our proprietary borders and therefore every effort will be made to conserve resources throughout our operations.

Clean Boss will try to not only meet existing environmental laws and regulation, but will endeavour to go beyond the status quo and see techniques and approaches that position us ahead of our competition.

The objectives of our policy are:

- ✓ To reduce the overall plastic waste in our business by choosing to use cleaning products in bulk amounts to reduce the usage of ready to use cleaning products in disposable packaging.
- ✓ To use biodegradable products where possible as a substitute for plastic products such as rubbish bags.
- ✓ To using digital alternatives in order to reduce the paper used within our business to marketing materials only.
- ✓ To ensuring all waste we remove from a clients place of business or a clients home is disposed of responsibly, meaning if it can be recycled it will be.
- ✓ To using environmentally-certified cleaning products wherever possible as they're better for the environment and completely biodegradable.
- ✓ To using reusable products such as microfibre cloths versus disposable cloths.
- ✓ To promote the benefits of being environmentally-focused to our clients, employees, franchisees and suppliers.
- ✓ To reduce and eliminate unnecessary travel, including reducing transport time for supplies and goods through effective time and inventory management.

Through our commitment of working towards a cleaner, greener New Zealand, we believe Clean Boss will be part of the solution and not the problem.

ETHAN GORDON
MANAGING DIRECTOR, CLEAN BOSS
